**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

Claims 1-5,7-12,14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bleasdale in view of Ellis. Bleasdale discloses the basic apparatus except for the use of a timer for better crushing control. Ellis solves this problem by disclosing similar apparatus including the use of a timer to control the motor; see column 4. In order to provide for a better control, it would have been obvious for one of ordinary skill in the art at the time of the invention to modify Bleasdale by providing a timer, taught to be desirable by Ellis. The remaining limitations would then have been obvious design choices only, especially in view of applicant's not arguing their merits.
